

I'm a full stack developer with 1.5 years of experience working with React, Tailwind, Node and Python. You can view samples of my work as a freelance developer [here](#) and [here](#) or visit my [portfolio here](#). I am a UX Design and Front End Bootcamp graduate and created a free bootcamp for Front End Developers transitioning to Full Stack. In addition to my freelance work, I am a lead full stack developer with Chingu, building an application using Agile methodologies within an asynchronous team environment.

SKILLS:

Languages & Frameworks - JavaScript, Python, ASP.NET, React, Express, Node, Next, GraphQL, SQL, HTML, CSS, Git, Jest

Databases - Firebase, PostgreSQL, MongoDB, Cloudinary, headless CMS(Contentful, Hygraph)

Libraries - Tailwind CSS, Bootstrap, Material UI, MapBox, Apollo, Axios, GraphQL-Request, Figma

Other - TDD, agile methodology, cloud platforms, UX design, web accessibility, REST APIs, GitHub, Visual Studio Code, Vercel, Netlify, Slack, Linux

Soft Skills - Collaborative, 7+ years leadership experience, positive, reliable, adaptable, willingness to learn, takes initiative, wears multiple hats, conflict resolution

RECENT PROJECTS:

Raine Gauthier Photography **React | Next | Tailwind | Firebase | GraphQL | Hygraph/Cloudinary | Vercel** **April 2023**

- Redesigned website from basic JS/HTML/CSS to Next/React/Tailwind with Hygraph headless CMS
- Authentication and authorization for client log in with Firebase
- Dashboard feature for uploading photos to Cloudinary and editing Galleries with drag and drop capability.

Sixpo: Non-Profit **React | Next | Tailwind | GraphQL | Hygraph | Vercel | Figma** **Dec 2022 – April 2023**

- Website built for a non-profit, SIXpo - Sexuality, Inclusion, and Exploration for their online and in person educational festival for disabled folks. Site utilizes dynamic routing, live updates to event schedule, filtered resources and blog posts.
- Collaborated with non-profit employees to ensure accessibility, increasing site engagement by 90%.
- Received positive feedback and appreciation, including partner organizations, resulting in 3 referrals.

WORK EXPERIENCE:

Lead Full Stack Developer **Chingu** **April 2023–Present**

- Led paired programming sessions multiple times per week
- Tech used: React, Javascript, Nextjs, Node.js, Tailwind, Firebase, Figma, Git, Github
- Led Agile sprint meetings and helped junior developers troubleshoot roadblocks
- Designed high fidelity Figma mock ups that translated to our build
- Organized file structure for application and built out high level JavaScript/React components

Full Stack Developer **Freelance** **Jun 2022– Present**

- Designed, built, and maintained 4 full stack websites for clients including an interactive photogallery and web accessibility website for charity festival for disabled folks.
- Completed websites received an increase of 75% in user engagement.
- Utilized headless CMS to create CRUD components for event tracking, speaker information, and blog posts, reducing client's time spent updating website by 75%.
- Practiced Agile methodology with weekly sprints, continuous deployment, and code reviews.

Business Owner **Flowers by Elizabeth** **Feb 2015 – April 2022**

- I collaborated with clients and community stakeholders to design and build sustainable gardens, while providing education on organic gardening practices through workshops and resources.
- Demonstrated outstanding leadership, storytelling, and public speaking skills to promote sustainable garden practices and build strong client relationships.
- Utilized effective time management and collaborative problem-solving to manage projects, train and mentor staff, and work effectively with cross-functional teams.
