Portfolio

I'm a full stack developer with experience with React, Tailwind, Node, and some Python and TypeScript and 7+ years in leadership roles. You can view samples of my work as a freelance developer here and here or visit my portfolio here. I am a UX Design and Front End Bootcamp graduate and created a free bootcamp for Front End Developers transitioning to Full Stack. In addition to my freelance work, I am a lead full stack developer with Chingu, building an application using Agile methologies within an asynchronous team environment.

SKILLS:

Languages & Frameworks - JavaScript, TypeScript, Python React, Next, Node, Express, GraphQL, SQL, HTML, CSS, Git, Jest

Databases - Firebase, PostgreSQL, MongoDB, Cloudinary, headless CMS(Contentful, Hygraph)

Libraries - Tailwind, Bootstrap, Material UI, MapBox, Apollo, Axios, GraphQL-Request, Figma

Other - TDD, agile methdology, cloud platforms, UX design, web accessibility, REST APIs, GitHub, Visual Studio Code, Vercel, Netlify, Slack, Linux

Soft Skills - Collaborative, leadership , positive, reliable, adapable, willingness to learn, takes inititaive, wears multiple hats, conflict resolution, empathetic

RECENT PROJECTS:

Raine Gauthier Photography   React | Next | Tailwind | Firebase | GraphQL | Hygraph/Cloudinary | Vercel   April 2023

- Redesigned website from basic JS/HTML/CSS to Next/React/Tailwind with Hygraph headless CMS
- Authentication and authorization for client log in with Firebase
- Dashboard feature for uploading photos to Cloudinary and editing Galleries with drag and drop capability.

Sixpo: Non-Profit   React | Next | Tailwind | GraphQL | Hygraph | Vercel | Figma   Dec 2022 – April 2023

- Website built for a non-profit, SIXpo - Sexuality, Inclusion, and Exploration for their online and in person educational festival for disabled folks. Site utilizes dynamic routing, live updates to event schedule, filtered resources and blog posts.
- Collaborated with non-profit employees to ensure accessibility, increasing site engagement by 90%.
- Received positive feedback and appreciation, including partner organizations, resulting in 3 referrals.

WORK EXPERIENCE:

Lead Full Stack Developer   Chingu   April 2023–Present

- Facilitated regular paired programming sessions using React, Next.js, Node.js and Tailwind to improve team productivity and coding skills
- Coordinated Agile sprint meetings and provided technical support to junior developers resulting in successful project delivery
- Produced high-quality Figma mock-ups that were instrumental in the design of our applications
- Contributed to organizing file structure for application and built out higher-level JavaScript/React components improving code readability and maintainability

Full Stack Developer   Freelance   Jun 2022– Present

- Designed, developed, and maintained 4 full stack websites, including an accessible website for a charity festival for disabled individuals.
- Achieved a 75% increase in user engagement on completed websites.
- Implemented headless CMS to streamline event tracking, speaker information, and blog post updates, resulting in a 75% reduction in client workload.
- Practiced Agile methodology with weekly sprints, continuous deployment, and code reviews to ensure efficient project delivery.

Business Owner   Flowers by Elizabeth   Feb 2015 – April 2022

- I collaborated with clients and community stakeholders to manage, design, and build sustainable gardens, while providing education on organic gardening practices through workshops and resources.
- Demonstrated outstanding leadership, storytelling, and public speaking skills to promote sustainable garden practices and build strong client relationships.
- Utilized effective time management and collaborative problem-solving to manage projects, train and mentor staff, and work effectively with cross-functional teams.
